

PROFESSIONAL AXIOM MANAGEMENT SUIT

PAMS-SUIT

Identity management and Access control is the discipline of managing access to enterprise resources to keep systems and data secure. As a key component of your security architecture, it can help verify your users' identities before granting them the right level of access to workplace systems and information. While people might use the terms identity management, authentication, and access control interchangeably, each of these individually serve as distinct layers for enterprise security processes.

Unlike any other security system Access control system is used by every employee, visitor, contractor, labour directly so deployment of access control is not complete till customer does not get system customized as per their organization process. RBH India has uniquely tried to give custom application for large deployment of integrated access control systems.
